Response to Election

Applicant's election without traverse of species A as illustrated in figures 1-3 in Paper No. 8 is acknowledged.

Claims 4-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 8.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. § 102(b) as being anticipated by Yoshii et al. See at least figures 3-5.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under

Art Unit: 3753

subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claim 3 is rejected under 35 U.S.C. § 103 as being unpatentable over Yoshii et al. in view of Phillips et al. The patent of Yoshii et al. discloses all the claimed features with the exception of an heat generating element on a boiling unit.

The patent of Phillips et al., in at least figures 1-3 and 17A, discloses that it is known to have use a plate condenser (8) and an heat generating element (10) on a boiling unit (5) for the purpose of fully condensing the boiled refrigerant. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Yoshii et al. use a plate heat exchanger as a condenser and an heat generating element on a boiling unit for the purpose of fully condensing the boiled refrigerant as disclosed in Phillips et al.

Conclusion
